

A BRIEF HISTORY OF TEA AUCTIONS IN CHITTAGONG

Following the partition of India in 1947, the tea producers in East Pakistan felt the need for tea auctions in Chittagong for disposal of their crop. This prompted four eminent international tea brokers namely W. F. Cresswell, J. Thomas, A. W. Figgis & Carrit Moran to jointly form a company along with Khan Bahadur Mujibur Rahman, on 6th June 1948, Pakistan Brokers Limited (later renamed National Brokers Limited) was formed.

A year later on 16th July, 1949 the first tea auction was held in Chittagong with a modest offering of 3,000 chests.

Auctions were suspended only for a brief period in 1971 during the War of Liberation and later commenced on 8th June, 1972.

In keeping with the growing demand of Bangladesh tea worldwide, fortnightly auctions changed to weekly auctions from 14th October, 1985.

E-Auction was inaugurated on 15th March, 2021.

Today this centre has established itself on the international tea scene, and after fulfilling internal demand exports teas abroad.

Bangladesh Tea Market ANNUAL REVIEW Season 2025/26

Crop & Weather

The overall weather pattern in country was by and large less favourable for agricultural crops as large parts of Bangladesh experienced frequent dry spells particularly in greater Sylhet and Chittagong Divisions where all Estates are located. Consequently, there was a sharp decline in crops from these areas.

In contrast to the above, Northern parts of Bangladesh recorded a useful rainfall and as a result, Small Holdings/BLF Factories were able to produce a larger quantity of tea than the previous season.

We give below the crop figures in million kg upto and including **June** 2025 and 2024.

Category	2025	2024
Estate	15.8	20.3
BLF/Small Holdings	6.8	3.8
Total for the Quarter	22.6	24.1

Rains become more infrequent during July and August in Sylhet and Chittagong districts resulted in quite a drastic fall in production from aforesaid Divisions whilst in North Bengal, crops surged ahead on the back of better growing conditions and a greater quantity of tea was produced during this period. The following table will illustrate the figures.

The production figures in million kg for **July-September**.

Category	2025	2024
Estate	29.81	31.42
BLF/Small Holdings	8.73	6.31
Total for the Quarter	38.54	37.43

Weather conditions improved from the middle of September in greater Sylhet and Chittagong Divisions, rainfall being more regular and copious than the same months in the previous season. This brought about a high level of cropping in October which continued until end of December. This quarter's intake helped to reduce the large deficit from the Estates sectors by a fair margin. The following statistics will bear out this fact.

October- December Quarter (Quantity in million kg)

Category	2025	2024
Estate	25.98	26.70
BLF/Small Holdings	7.98	4.58
Total for the Quarter	33.96	31.28

Annual Production

In the final count, the total production (Quantity in million kg) in the country for both Estates and BLF Sectors is as under:

Category	2025	2024
Estate	71.63	78.21
BLF/Small Holdings	23.30	14.83
Total for the Year	94.93	93.04

Quality

Noticeable improvement in general standard of teas in the country for many a Estates and Bought Leaf Factories focused on upgrading quality of their manufacture and thereby a greater weight of good quality tea was available at the auctions.

This had a positive effect on price levels as it generated more competition at the auction from all sections of the market leading to higher prices.

Demand and Market Dynamics

Season under review started off with the first sale being held on 5th May, 2025 with strong demand from the buyers for black, clean, good liquoring teas which fetched a price between Tk. 240/- and Tk.265/- per kg but the plain varieties were not much in demand and some were selling between Tk. 200/- and Tk.210/- with fair withdrawals. Furthermore a carry-over of large weights of previous Season's unsold teas unto New Season's sales was also a reason for lack of sufficient demand. Demand gradually improved and in about the first week of June at Sale 05 price levels began to move by small margins and the average price for All teas rose upto Tk.230/- per kg.

A landmark decision on minimum auction prices for teas from all tea growing areas of the country came into effect from Sale 06 on 16th June, 2025. This was fixed at Tk.245/- per kg for all Sylhet and Chittagong teas and at Tk.170/- for Bought Leaf Factories. This had a positive effect on auction prices from thereon. However, it took a few sales for the buyers to become familiar and adopt to this new price levels.

Auction sold quantity and average price upto **June :**

May-June (All Teas)

2025		2024	
Quantity (M.Kg)	Price (Taka)	Quantity (M.Kg)	Price (Taka)
10.44	229.42	8.16	227.02

July-September quarter witnessed a steady increase in demand and a pattern in buying soon emerged where buyers were operating forcefully on all bright and coloury teas from the Estates whilst discarding plainer teas from this sector in favour of clean BLF teas. BLF teas steadily supplanted the lesser quality of Estate teas on account of the price advantage that they derived from limits imposed by the Government. Estate teas selling limits being high, gave the BLF teas greater advantage over Estate.

The Table below gives the Quantity and Average price for the period July- September

July-September (All Teas)

2025		2024	
Quantity (M.Kg)	Price (Taka)	Quantity (M.Kg)	Price (Taka)
28.80	239.50	26.97	211.36

Competition at the auctions gathered a momentum as the months progressed with tea prices appreciating further, the Good and the Best teas were being quoted at Tk.260/- to Tk.277/- per kg.

BLF teas benefitted greatly in the general rise in price and their teas were selling between Tk.240/- and Tk.260/- per kg in comparison September prices ranged between Tk.170/- and Tk.220/- per kg.

October-December (All Teas)

2025		2024	
Quantity (M.Kg)	Price (Taka)	Quantity (M.Kg)	Price (Taka)
29.60	255.24	28.95	205.92

New year heralded an even higher level of prices following very strong demand from all segments of the market. Declining quantity of tea on offer at auction owing to drastic fall in production from Estate was the main reason for the upsurge in demand.

The following table illustrates the performance of the industry in January–March period at Chittagong auction.

January-March (All Teas)

2026		2025	
Quantity (M.Kg)	Price (Taka)	Quantity (M.Kg)	Price (Taka)
18.08	257.94	17.79	187.44

Finally, the Auction Sale quantity and Average Price for ALL TEA is given as under.

Season 2025 / 2026		Season 2024 / 2025	
Quantity (M.Kg)	Price (Taka)	Quantity (M.Kg)	Price (Taka)
88.43	246.91	81.88	204.65

Tea Production and Export from Major Producing countries in 2025 in brief

World-wide tea production continued to rise steadily and in the last year it was 7,266,437 M.T as against 6,727,050 M.T in 2024, recording a gain of 179,287 M.T. Asian Continent has been the major Producer China being the largest having produced 3,920,000 M.T. This is 180,000 M.Tons higher than 2024. India's production was recorded at 1,369,980 M.T as against 1,303,530 M.T in 2024. Vietnam also showed a significant rise in production. Its crop was 245,000 M.T as against 180,440 M.T. Sri Lanka's out-turn was 264,123 M.T which was a touch higher than 2024. In the African Continent Tea production declined quite substantially especially in Kenya where the crop harvested was 549,000 M.T in 2025 as against 598,478 M.T in 2024. Turkey also produced less tea, her 2025 production was 254,130 M.T against 275,132 M.T in 2024. Bangladesh tea production recorded a modest gain. Its crop was 94,912 M.T in 2025 compared to 93,042 M.T in 2024.

Global exports crossed 2 Billion M.T for the first time. Asia was the greatest contributor of which China stands out to be the largest as she shipped out 418,757 M.T including Green tea export of 323,858 M.T. India made a significant stride in her exports as she shipped out 280,440 M.T. Exports from African Continent was much lower but Kenya was able to export 580,000 M.T. as against 594,503 M.T in 2024.

Globally auction centres displayed a mixed scenario. Indian auctions recorded a much higher turn-over. Total Sale in 2025 was 664,167 M.T as against 590,036 M.T in 2024. However, price realisation was lower than the previous year. Colombo auction volume was steady at 242,843 M.T but again auction rates were lower.

At Mombasa auctions the quantity was lower than 2024 reflecting a drop in production but the Averages price for all Tea was almost same as 2024. In 2025, it was 2.05 USD per kg as against 2.06 USD per kg in 2024.

Chittagong had a stellar auction season as you will see elsewhere in the review.

Highlights

1. Annual Crop for the year 2025 is 94.93MKg which is higher than that of 2024 which was 93.04MKg
2. Higher quantity of Tea was sold in the auctions in season 2025-26 which is 88.41MKg as against 85.06MKg in the previous season
3. Substantial increase in price realization in the auctions in season 2025-26. Average price for the season is Tk 246.87 as against Tk203.99 in the previous which is higher by Tk 42.88.

Breakdown of Estate and BLF teas is as following :

Category	Season 2025-26		Season 2024-25	
	Qty. (M.Kg)	Avg (Tk)	Qty. (M.Kg)	Avg (Tk)
Estate	70.76	254.39	74.4	209.80
BLF	17.65	216.72	10.6	163.21

4. Bangladesh imported 0.051MKg tea in 2025 as against 0.002MKg last year
5. Export of Bangladesh Tea dropped in 2025 to 0.94 MKg from 2.44MKg last year
6. Revision of floor price (Tk 245 for Sylhet and Chittagong teas and Tk 170 for Bought Leaf Factory teas) in June 2025 impacted the overall tea market and was instrumental in higher price realization till the end of the season.

Prospects for Bangladesh Tea 2026

In the back-drop of war in West Asia it is impossible to make any intelligent forecast for the future except to say that its impact is causing huge rise in cost of living in every country in the world at varying degrees. In Bangladesh its impact is being felt more keenly as the economy is greatly dependent on imports particularly petroleum products and gas. Recent hike in the price of electricity has worsened the economic situation in the country by a greater degree.

However, a slight relief from the general gloom — it is gratifying to see that the weather has been more seasonable this year than the past which may result in higher crops both from Estate and BLF sectors.

On the demand front we expect that buyers could be more active and increase their off-take at the auctions. However they would be operating forcefully on coloury bright teas but neglect the lesser varieties. The reason for this being that unlike last season, when supply and demand were at equilibrium, medium and plain teas could find a market but this season the scenario could be very different.

It is felt that the greater volume of teas at the auctions during this season may result in buyers operating selectively in their purchase and neglect the plain teas.

In the light of the above we would advise our Producers to pay utmost attention in plucking and manufacture to produce a better quality of tea to cater to ever increasing demand from the markets for coloury bright teas.

On the subject of grade preference we foresee a continuation of last years' trend whereby small Broken, neat Fannings and all clean Dusts will be in strong demand but plain teas facing a negligent demand.
